

ChemCheck™

Water Quality Monitoring System

Do less, know more.

ChemCheck is constantly monitoring your water quality so you don't have to, sending alerts to your smart device, using the Pentair Home app, when your pool water needs attention. All you need to do is jump in and get to splashin' and relaxin'.

ChemCheck is always on. So your only duty is to enjoy the pool.

Gain water confidence with the Pentair ChemCheck™ Water Quality Monitoring System. It's always testing the pool for you, keeping the water sparkling—and keeping you one step ahead by sending alerts right to your smart device.

With ChemCheck connected, you'll know so much more:

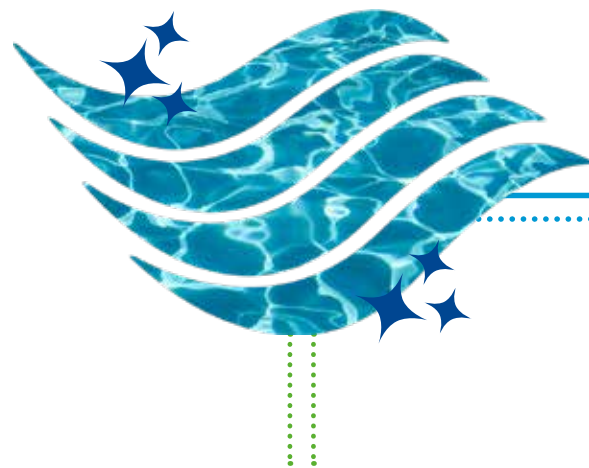

- KNOW IF YOUR SANITIZER IS WORKING.
- KNOW HOW WELL THE POOL CAN KEEP ITSELF CLEAN.
- KNOW WHAT THE PH LEVEL IS.
- KNOW WHEN TO ACT AND WHAT TO DO.

Confidence in the now, and the future.

ChemCheck will measure your pool's sanitizing potential using Oxidation Reduction Potential (ORP). A lot goes into it, much more than just "do you have enough chlorine?" ChemCheck actually analyzes how well your sanitizing chlorine is working.

POOL WATER HAS A LOT GOING ON

From sunscreen to sweat to microbes and other unmentionables, your chlorine has to battle through a lot to get to the bad stuff it's supposed to kill.

THE BATTLE IS MEASURABLE

When your chlorine kills the bad stuff (called oxidation), electrons flow in a measurable way. That's what ChemCheck is monitoring to determine if the chlorine is winning or not. That's your pool's ORP.

THE DATA BECOMES ACTION

ChemCheck monitors pH levels and other factors to help determine the correct actions to take—and sends alerts and advice directly to your smart device, through the Pentair Home app.
